
Product Data Sheet

Product Name: Guanabenz

Cat. No.: GC25484

Chemical Properties

Cas. No. 5051-62-7

Formula C₈H₈Cl₂N₄

M.Wt 231.08

Solubility DMSO: 12 mg/mL (51.93 mM);Water: Insoluble;Ethanol: 15 mg/mL (64.91 mM)

Storage Store at -20°C

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure **Background**

Guanabenz (GBZ, GA, Wytensin, Wy-8678, BR-750) is an orally active central alpha 2-adrenoceptor (α_2 adrenergic receptor) agonist with antihypertensive action.

Interleukin-6 (IL6), colony stimulating factor 2 (Csf2), and cyclooxygenase-2 (Cox2) are downregulated by guanabenz-driven phosphorylation of eukaryotic translation initiation factor 2 α (eIF2 α). Although expression of IL1 β and Tumor Necrosis Factor- α (TNF α) was suppressed by guanabenz, their downregulation was not directly mediated by eIF2 α signaling.[2]
