

Product Data Sheet

Product Name: Protein A/G Agarose
Cat. No.: GC27607
Batch No.: 1

Product Data

Purity	>98%	Source
Physical Appearance	solid	Shipping Condition
Synonyms	Protein A/G Agarose	
Formulation		

Introduction

GLPBIO Protein A/G Agarose is an affinity chromatography medium for separation and purification of immunoglobulins. GLPBIO Protein A/G Agarose consists of purified Protein A/G recombinant fusion protein that has been covalently immobilized onto high-quality cross-linked 4% beaded agarose, binds nearly all isotypes and mammalian species of IgG from serum, ascites fluid, cell culture supernatant and other ant. The product contains 0.5 mL of gel per 1 mL of total volume. Prior to use, ensure the gel is thoroughly resuspended and mixed before aspiration. The specifications of the product correspond to the actual resin volume, with the resin content of 50%.

Stability

4°C, 2 years. Do not dry or freeze

Background

GLPBIO Protein A/G Agarose is a high-quality affinity chromatography medium for separation and purification of immunoglobulins.

GLPBIO Protein A/G Agarose consists of purified Protein A/G recombinant fusion protein that has been covalently immobilized onto high-quality cross-linked 4% beaded agarose, binds nearly all isotypes and mammalian species of IgG from serum, ascites fluid, cell culture supernatant and other ant.

The product contains 0.5 mL of gel per 1 mL of total volume.

Prior to use, ensure the gel is thoroughly resuspended and mixed before aspiration. The specifications of the product correspond to the actual resin volume, with the resin content of 50%.

Caution: Product has not been fully validated for medical applications. For research use only.
