
Product Data Sheet

Product Name: Bavisant
Cat. No.: GC35471

Chemical Properties

Cas. No. 929622-08-2

SMILES O=C(N1CCN(C2CC2)CC1)C(C=C3)=CC=C3CN4CCOCC4

Formula C19H27N3O2 M.Wt 329.44

Solubility DMSO : 100 mg/mL (303.55 mM; Need ultrasonic) Storage Store at -20°C

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure

Background

Bavisant (JNJ-31001074) is a highly selective, orally active antagonist of the human H3 receptor with a novel mechanism of action, involving wakefulness and cognition, with potential as a treatment for ADHD. IC50 Value: Target: H3 receptor in vitro: Bavisant completed a phase II ADHD trial, but no results have been reported [1]. in vivo: Mean change from baseline in the total ADHD-RS-IV score at day 42 (primary efficacy endpoint) was -8.8 in the placebo group versus -9.3, -11.2 and -12.2 in the bavisant 1•mg/day, 3•mg/day and 10•mg/day groups, respectively; the change in the 10•mg/day group was not statistically superior to placebo (p=0.161), and hence statistical comparisons of the 1•mg/day and 3•mg/day groups with placebo based on a step-down closed testing procedure were not performed [2]. Clinical trial: A Study to Characterize the Pharmacokinetics and Effect of Food on JNJ-31001074 in Healthy Volunteers. Phase 2
