
Product Data Sheet

Product Name: Amino-Tri-(carboxyethoxymethyl)-methane hydrochloride
Cat. No.: GC66253

Chemical Properties

Cas. No. 1416771-72-6

Formula $C_{13}H_{24}ClNO_9$ M.Wt 373.78

Solubility Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Amino-Tri-(carboxyethoxymethyl)-methane hydrochloride is a cleavable PEG **ADC linker** used in the synthesis of antibody-drug conjugates (ADCs). Amino-Tri-(carboxyethoxymethyl)-methane hydrochloride is also a PEG-based **PROTAC linker** that can be used in the synthesis of PROTACs^{[1][2]}.

ADCs are comprised of an antibody to which is attached an ADC cytotoxin through an ADC linker^[1].

PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins^[2].

Caution: Product has not been fully validated for medical applications. For research use only.
