
Product Data Sheet

Product Name: Cholic acid-d5

Cat. No.: GC66372

Chemical Properties

Cas. No. 53007-09-3

Formula $C_{24}H_{35}D_5O_5$ M.Wt 413.6

Solubility DMSO : 100 mg/mL (241.78 mM; ultrasonic and warming and heat to 60°C) Storage Store at -20°C

General tips For obtaining a higher solubility , please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT , or blue ice upon request.

Structure **Background**

Cholic acid-d5 is the deuterium labeled Cholic acid. Cholic acid is a major primary bile acid produced in the liver and usually conjugated with glycine or taurine. It facilitates fat absorption and cholesterol excretion.

Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs^[1].

Caution: Product has not been fully validated for medical applications. For research use only.
