
Product Data Sheet

Product Name: NH₂-O-C₅-COOH hydrobromide

Cat. No.: GC66920

Chemical Properties

Cas. No. 448954-98-1

Formula C₆H₁₄BrNO₃ M.Wt 228.08

Solubility Storage Store at -20°C

General tips For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure **Background**

NH₂-O-C₅-COOH (hydrobromide) is an alkyl chain-based PROTAC linker that can be used in the synthesis of PROTACs^[1].

PROTACs contain two different ligands connected by a linker; one is a ligand for an E3 ubiquitin ligase and the other is for the target protein. PROTACs exploit the intracellular ubiquitin-proteasome system to selectively degrade target proteins^[1].
