
Product Data Sheet

Product Name: Propionylpromazine-d6 hydrochloride

Cat. No.: GC68420

Chemical Properties

Cas. No. 1262770-67-1

Formula C₂₀H₁₉D₆ClN₂OS

M.Wt

382.98

Solubility

Storage

Store at -20°C

General tips

For obtaining a higher solubility, please warm the tube at 37 °C and shake it in the ultrasonic bath for a while. Stock solution can be stored below -20°C for several months.

Shipping Condition Evaluation sample solution : ship with blue ice All other available size: ship with RT, or blue ice upon request.

Structure

Background

Propionylpromazine-d6 hydrochloride is the deuterium labeled Propionylpromazine hydrochloride. Propionylpromazine hydrochloride (Propiopromazine hydrochloride), a **dopamine receptor D2 (DRD2)** antagonist, can be used in the research of Parkinson disease^[1].

Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs^[1].
