

Product Data Sheet

Product Name: Anti-c-Myc Magnetic Beads
Cat. No.: GK30005

Features

Applications	Concentration: 10 mg/mL Bead Diameter: 2µM Binding Capacity: >0.5 mg protein/mL beads Storage Buffer: PBS,ph 7.2
Shipping	Ship with blue ice.
Storage	Stored at 4°C, and is stable for up to 2 years. Do not centrifuge, dry or freeze the magnetic beads.
Usage	For Research Use Only! Not For Use in Humans.

Protocol

GK30005

1. 清洗磁珠：1×PBS + 0.5% Tween-20, pH 7.4
 2. 磁珠清洗
 3. 磁珠清洗
 4. 磁珠清洗
 5. 磁珠清洗
1. 磁珠清洗：1×PBS + 0.5% Tween-20, pH 7.4
2. 磁珠清洗
3. 磁珠清洗
4. 磁珠清洗
5. 磁珠清洗
1. 磁珠清洗：1×PBS + 0.5% Tween-20, pH 7.4
2. 磁珠清洗
3. 磁珠清洗
4. 磁珠清洗
5. 磁珠清洗

Caution: Product has not been fully validated for medical applications. For research use only.

Background

Anti-c-Myc magnetic beads are used for immunoprecipitation (IP) of specific c-Myc-tagged proteins expressed in bacterial and mammalian cells and in vitro expression systems. Anti-c-Myc magnetic beads are based on amino magnetic beads, with 2 μm particle size, covalently coupling with high quality mouse IgG1 monoclonal antibody that recognizes the c-Myc-epitope tag (EQKLISEEDL) derived from the human c-Myc protein. Magnetic beads are removed from the solution manually by using a magnetic stand or automatically by using an instrument. With high loading of c-Myc-tagged protein and high specificity, Anti-c-Myc Magnetic Beads are also suitable for Co-immunoprecipitation and purification of c-Myc-tagged protein.

Anti-c-Myc Magnetic Beads are used for immunoprecipitation (IP) of specific c-Myc-tagged proteins expressed in bacterial and mammalian cells and in vitro expression systems. Anti-c-Myc Magnetic Beads are based on amino magnetic beads, with 2 μm particle size, covalently coupling with high quality mouse IgG1 monoclonal antibody that recognizes the c-Myc-epitope tag (EQKLISEEDL) derived from the human c-Myc protein. Magnetic beads are removed from the solution manually by using a magnetic stand or automatically by using an instrument. With high loading of c-Myc-tagged protein and high specificity, Anti-c-Myc Magnetic Beads are also suitable for Co-immunoprecipitation (Co-IP) and purification of c-Myc-tagged protein.
