
Product Data Sheet

Product Name: Nucleoside-5'-Triphosphate Set

Cat. No.: GN20065

Chemical Properties

| | | |
|--------------|--|----------------|
| Length | Concentration | |
| Buffer | Storage | -20°C or below |
| Applications | Aptamers, In vitro Transcription, Laboratory Developed Tests (LDT) & Analyte Specific Reagents (ASR), PCR & RT-PCR | |

Background

1 (100 mM) vial each of ATP, CTP, GTP and UTP. Each NTP is analyzed separately by AX-HPLC, RP-HPLC, 31P NMR and Mass Spec. Free of DNases and RNases. Each shipped at 100 mM in H₂O. All available in sodium salt form. CTP and UTP available in lithium salt form. Please specify at time of order if particular salt form is required.

Caution: Product has not been fully validated for medical applications. For research use only.
