
Product Data Sheet

Product Name: KGF Mouse
 Cat. No.: GP20679
 Batch No.: 1

Product Data

Purity	>98%	Source	Escherichia Coli.
Physical Appearance	solid	Shipping Condition	Shipped at Room temp.
Synonyms	HBGF-7; FGF7; FGF-7; KGF; Keratinocyte growth factor; Fibroblast growth factor 7; Heparin-binding growth factor 7.		
Amino Acid Sequence	MCNDMSPEQT ATSVNCSSPE RHTRSYDYME GGDIVRRLF CRTQWYLRID KRGKVKGTOE MKNSYNIMEI RTVAVGIVAI KGVSEYYLA MNKEGKLYAK KECNEDCNFK ELILENHYNT YASAKWTHSG GEMFVALNQK GIPVKGKGTK KEQKTAHFLP MAIT.		
Solubility	It is recommended to reconstitute the lyophilized KGF in sterile 18MΩ-cm H ₂ O not less than 100μg/ml, which can then be further diluted to other aqueous solutions.		
Formulation	The protein was lyophilized from a concentrated (1mg/ml) solution containing 20mM Phosphate buffer pH-8 and 0.1M NaCl.		

Introduction

KGF is a member of the fibroblast growth factor (FGF) family. FGF family members possess broad mitogenic and cell survival activities, and are involved in a variety of biological processes, including embryonic development, cell growth, morphogenesis, tissue repair, tumor growth and invasion. FGF7 is a potent epithelial cell-specific growth factor, whose mitogenic activity is predominantly exhibited in keratinocytes but not in fibroblasts and endothelial cells. Studies of mouse and rat homologs of this gene implicated roles in morphogenesis of epithelium, reepithelialization of wounds, hair development and early lung organogenesis.

Biological Activity

The ED₅₀, calculated by the dose-dependant stimulation of KGF-responsive BaF3 indicator cells (measured by ³H-thymidine uptake) is < 10ng/ml corresponding to a

Caution: Product has not been fully validated for medical applications. For research use only.

Product Data Sheet

specific activity of 100,000 Units/mg.

Stability

Lyophilized KGF although stable at room temperature for 3 weeks, should be stored desiccated below -18°C . Upon reconstitution FGF7 should be stored at 4°C between 2-7 days and for future use below -18°C . For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Please prevent freeze-thaw cycles.

Background

Keratinocyte Growth Factor-1 Mouse Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 164 amino acids and having a molecular mass of 18.9 kDa. The FGF-7 is purified by proprietary chromatographic techniques.

Caution: Product has not been fully validated for medical applications. For research use only.
