### Introduction

MANF is a 20kDa protein which belongs to the ARMET family. MANF was originally known as an arginine-rich region protein which was extremely mutated in a large number of tumors. MANF Expression is induced during ER stress, signifying that MANF takes part in protein quality control during ER stress.

### Biological Activity

The ED<sub>50</sub> as determined by a cell proliferation assay using rat C6 cells is less than 10µg/ml, corresponding to a specific activity of >100 IU/mg.

### Stability

Lyophilized MANF although stable at room temperature for 3 weeks, should be stored desiccated below -18°C . Upon reconstitution MANF should be stored at 4°C between 2-7
