
Product Data Sheet

Product Name: Bcl XL Human, His

Cat. No.: GP22866

Batch No.: 1

Product Data

Purity	>98%	Source	Escherichia Coli.
Physical Appearance	solid	Shipping Condition	Shipped at Room temp.
Synonyms	BclXL; Bcl-X(L); Bcl-XL.		
Solubility	Suspend BclXL in 100 μ l of 0.5M Acetic acid, over night at 4°C . Dilute 10 fold into selected buffer system. Bcl-XL has tendency to form intramolecular disulfide bond, 5mM DTT is recommended in assay buffer. When running SDS-PAGE gel, 10mM DTT is recommended.		
Formulation	The protein contains 10mM Tris-HCL pH-8, 1mM EDTA and 250mM NaCl.		

Introduction

Bcl-XL is a transmembrane protein located in the mitochondrial membranes of cells that are long-lived and postmitotic, such as adult brain cells. It plays a role in the signal transduction pathway of the FAS-Ligand. Bcl-XL is an anti-apoptotic protein which is a member of the Bcl-2 family which are able to form heterodimers, and this is a significant event in the regulation of apoptosis. BCL-XL is involved in the survival of cancer cells. Bcl-xL is the leading monitor of apoptosis/active cell suicide. Bcl-xL has cell death repressor activity and therefore acts as a survival protein.

Stability

Lyophilized Bcl-XL although stable at room temperature for 3 weeks, should be stored desiccated below -18°C . Upon reconstitution Bcl-XL should be stored at 4°C between 2-7 days and for future use below -18°C .For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA).Please prevent freeze-thaw cycles.

Background

Bcl-XL Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing amino acids 1-210. The Bcl-XL is expressed as His-Tag fusion protein and purified by proprietary chromatographic techniques.

Caution: Product has not been fully validated for medical applications. For research use only.
