### Introduction

DiGeorge syndrome critical region gene 6 (DGCR6) shares homology with the *Drosophila melanogaster* gonadal protein, that participates in gonadal and germ cell development, and also with the gamma-1 subunit of human laminin. DGCR6 is involved in DiGeorge syndrome pathology and in schizophrenia.

### Stability

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.

### Background

DGCR6 Human Recombinant produced in E.Coli is a single, non-glycosylated polypeptide chain containing 243 amino acids (1-220 a.a) and having a molecular mass of 27kDa. DGCR6 is fused to a 23 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.
