
Product Data Sheet

Product Name: S100b Human
 Cat. No.: GP24477
 Batch No.: 1

Product Data

Purity	>98%	Source	Escherichia Coli.
Physical Appearance	solid	Shipping Condition	Shipped with Ice Packs.
Synonyms	S100Calcium Binding Protein B; S-100 Protein Subunit Beta; S100 Calcium Binding Protein; Beta (Neural); S100 Calcium-Binding Protein; Beta (Neural); S-100Calcium-Binding Protein; Beta Chain; S100 Calcium-Binding Protein B; S-100Protein Beta Chain; S100beta; S100-B; S100; NEF.		
Amino Acid Sequence	MSELEKAMVALIDVFHQYSG REGDKHKLKK SELKELINNE LSHFLEEIKE QEVVDKVMET LDNDGDGEDC FQEFMAFVAMVTTACHEFFE HE.		
Formulation	The S100b protein solution (1mg/ml) contains PhosphateBuffered Saline (pH 7.4) and 10% glycerol.		

Introduction

S100b is a member of the S100 family of proteins which are a family of EF-hand calcium binding proteins that exist mostly as dimers of the 20 currently identified individual S100 monomers. The S100B homodimer is expressed in cells of the central nervous system, glial cells and in certain peripheral cells e.g. Schwann cells, melanocytes, adipocytes and chondrocytes. S100 proteins are localized either in the cytoplasm or the nucleus of a wide range of cells. S100 proteins are involved in the regulation of a number of cellular processes such as cell cycle progression and differentiation. There are at least 13 members in the S100 gene family, which are located as a cluster on chromosome 1q21; however, S100b is located at 21q22.3. The determination of S100B in serum levels may be used to monitor the extent of brain injury and malignant melanoma. S100b proteins may have a role in Neurite extension, proliferation of melanoma cells, stimulation of Ca²⁺ fluxes, inhibition of PKC-mediated phosphorylation, astrocytosis and axonal proliferation, and inhibition of microtubule assembly. Chromosomal rearrangements and altered expression of the S100b gene are implicated in several neurological, neoplastic,

Caution: Product has not been fully validated for medical applications. For research use only.

Product Data Sheet

and other types of diseases, including Alzheimer's disease, Down's syndrome, epilepsy, amyotrophic lateral sclerosis, melanoma, and type I diabetes.

Stability

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.

Background

S100b Human Recombinant produced in E.Coli is a single, non-glycosylated, polypeptide chain containing 92 amino acids (1-92 a.a.) and having a molecular mass of 10.7kDa. The S100b is purified by proprietary chromatographic techniques.

Caution: Product has not been fully validated for medical applications. For research use only.
