
Product Data Sheet

Product Name: SARS Mosaic S(M)

Cat. No.: GP25164

Batch No.: 1

Product Data

Purity >98%

Source

Physical
Appearance solid

Shipping
Condition Shipped with Ice Packs.

Formulation 25mM Tris-HCl, 0.4% sarcosyl, 0.25% Triton X100 and 50% glycerol.

Introduction

SARS Coronavirus is an enveloped virus containing three outer structural proteins, namely the membrane (M), envelope (E), and spike (S) proteins. Spike (S)-glycoprotein of the virus interacts with a cellular receptor and mediates membrane fusion to allow viral entry into susceptible target cells. Accordingly, S-protein plays an important role in virus infection cycle and is the primary target of neutralizing antibodies.

Stability

SARS Mosaic protein is shipped at ambient temperature. Upon arrival, store at -20C.

Background

The E.Coli derived 38 kDa recombinant mosaic protein contains the middle section of the Spike protein 408-470, 540-573 amino acids immunodominant regions.

Caution: Product has not been fully validated for medical applications. For research use only.
