## Product Data Sheet

---

Product Name: SARS Mosaic S(C)

Cat. No.: GP25165

Batch No.: 1

### Product Data

Purity >98%

Source

Physical Appearance solid

Shipping Condition Shipped with Ice Packs.

Formulation 25mM Tris-HCl, 0.4% sarcosyl, 0.25% Triton X100 and 50% glycerol.

### Introduction

SARS Coronavirus is an enveloped virus containing three outer structural proteins, namely the membrane (M), envelope (E), and spike (S) proteins. Spike (S)-glycoprotein of the virus interacts with a cellular receptor and mediates membrane fusion to allow viral entry into susceptible target cells. Accordingly, S-protein plays an important role in virus infection cycle and is the primary target of neutralizing antibodies.

### Stability

SARS Mosaic protein is shipped at ambient temperature. Upon arrival, store at -20C.

### Background

The E.Coli derived 37 kDa recombinant mosaic protein contains the C-terminal section of the Spike protein 1051-1076, 1121-1154, 1162-1190 amino acids immunodominant regions.

**Caution: Product has not been fully validated for medical applications. For research use only.**
