
Product Data Sheet

Product Name: HBXIP Human
 Cat. No.: GP25332
 Batch No.: 1

Product Data

| | | | |
|---------------------|--|--------------------|-------------------------|
| Purity | >98% | Source | Escherichia Coli. |
| Physical Appearance | solid | Shipping Condition | Shipped with Ice Packs. |
| Synonyms | Regulator complex protein LAMTOR5; Hepatitis B virus X-interacting protein; HBV X-interacting protein; HBX-interacting protein; Late endosomal/lysosomal adaptor and MAPK and MTOR activator 5; LAMTOR5; HBXIP; XIP. | | |
| Amino Acid Sequence | MGSSHHHHHH SSGLVPRGSH MGSHEMPGAG HLDGHRAGSP SLRQALCDGS AVMFSSKERG RCTVINFPVPL EAPLRSTPRS RQVTEACGGE GRAVPLGSEP EWSVGGMEAT LEQHLEDTMK NPSIVGVLCT DSQGLNLGCR GTLSDEHAGV ISVLAQQAQK LTSDPTDIPV VCLESDNGNI MIQKHDGIV AVHKMAS. | | |
| Formulation | The HBXIP solution (1mg/ml) contains 20mM Tris-HCl buffer (pH 8.0), 0.1M NaCl, 10% glycerol and 1mM EDTA. | | |

Introduction

Hepatitis B virus x interacting protein (HBXIP) forms a complex with the C-terminus of hepatitis B virus X (HBX) protein. HBXIP negatively regulates HBX activity and changes the replicative life cycle of the virus. Furthermore, HBXIP is involved in bipolar spindle formation and regulates centrosome dynamics and cytokinesis in cells, possibly due to interaction with Dynein light chain. HBXIP is highly expressed in the skeletal and cardiac muscle, followed by pancreas, kidney, liver, brain, placenta and lung. HBXIP has elevated levels in both cancerous and non-cancerous liver tissue of patients with chronic HBV infection compared with hepatic tissue without HBV infection.

Stability

Store at 4°C if entire vial will be used within 2-4 weeks. Store, frozen at -20°C for longer periods of time. For long term storage it is recommended to add a carrier protein (0.1% HSA or BSA). Avoid multiple freeze-thaw cycles.

Caution: Product has not been fully validated for medical applications. For research use only.

Product Data Sheet

Background

HBXIP Human Recombinant produced in E. coli is a single polypeptide chain containing 197 amino acids (aa 1-173) and having a molecular mass of 20.7kDa. HBXIP is fused to a 24 amino acid His-tag at N-terminus & purified by proprietary chromatographic techniques.

Caution: Product has not been fully validated for medical applications. For research use only.
