
Product Data Sheet

Product Name: Rubella E2
Cat. No.: GP25462
Batch No.: 1

Product Data

Purity	>98%	Source	
Physical Appearance	solid	Shipping Condition	Shipped with Ice Packs.
Formulation	20mM imidazol, 8M urea and 0.3M NaCl.		

Introduction

The rubella virus (RV) structural proteins capsid, E2, and E1 are synthesized as a polyprotein precursor. The signal peptide that initiates translocation of E2 into the lumen of the endoplasmic reticulum remains attached to the carboxy terminus of the capsid protein after cleavage by signal peptidase.

Stability

Rubella protein although stable at 4°C for 1 week, should be stored below -18°C .Please prevent freeze thaw cycles.

Background

The E.Coli derived recombinant protein contains the Rubella Virus E2 regions, 31-105 amino acids.

Caution: Product has not been fully validated for medical applications. For research use only.
