## Product Data Sheet

---

Product Name: CoV-2-S1  
Cat. No.: GP26390  
Batch No.: 1

### Product Data

Purity	>98%	Source	HEK293
Physical Appearance	solid	Shipping Condition	withIcePacks
Formulation	nCoV-S1protein solution is supplied inDPBS pH 7.4.DPBS pH 7.4.		

### Introduction

A human infecting coronavirus (viral pneumonia) called 2019 novel coronavirus, 2019-nCoV was found in the fish market at the city of Wuhan, Hubei province of China on December 2019. The 2019-nCoV shares an 87% identity to the 2 bat-derived severe acute respiratory syndrome 2018 SARS-CoV-2 located in Zhoushan of eastern China. 2019-nCoV has an analogous receptor-BD-structure to that of 2018 SARS-CoV, even though there is a.a. diversity so thus the 2019-nCoV might bind to ACE2 receptor protein (angiotensin-converting enzyme 2) in humans. While bats are possibly the host of 2019-nCoV, researchers suspect that animal from the ocean sold at the seafood market was an intermediate host. RSCU analysis proposes that the 2019-nCoV is a recombinant within the viral spike glycoprotein between the bat coronavirus and an unknown coronavirus.

### Stability

Protein is shipped on ice packs. Upon arrival, Store at -20°C.

### Background

The HEK293 derived recombinant protein contains the Novel Coronavirus 2019-nCoV Spike Glycoprotein S1, Wuhan-Hu-1 strain, amino acids 1-674 fused to Fc tag at C-terminal.

**Caution: Product has not been fully validated for medical applications. For research use only.**
